

ABHISHEK KUMAR

| abhishek.zxsa@gmail.com | (+91) - 9625691602 | www.linkedin.com/in/abhishekkumar1602 |

With over 2.5 years of experience in Software Development and **DevOps**, I specialize in automating deployments, optimizing cloud infrastructure, and enhancing system reliability. Skilled in designing and managing **CI/CD Pipelines**, streamline software delivery through **Automation**. I have hands-on expertise in **Containerization** and deploying scalable applications in cloud environments. With experience in **Cloud Hosting**, **Backup**, and **Disaster Recovery**, I am passionate about improving development workflows, enhancing scalability, and fostering seamless integration between development and operations.

Work Experience

DevOps Engineer, Expedien eSolutions Ltd. Noida

Feb 2023 - Present

- Designed & implemented CI/CD pipelines using GitLab CI/CD for 25+ projects, integrating code, building Docker images, and deploying to AWS ECS, improving deployment efficiency by 40%.
- Deployed and managed multiple Open-Source Applications such as GitLab CE, OpenProject, and Mattermost on AWS, provisioning development environments and implementing automated backup/restore processes using EC2, RDS, S3, and IAM, ensuring seamless workflows and data integrity.
- Containerized 40+ applications (Laravel, Yii, ReactJS, NextJS, FastAPI, legacy .NET 4) using optimized Docker images for scalable and consistent deployments.
- Migrated version control from SVN to Git & GitLab CE, reducing repository size by 60% and improving collaboration efficiency.
- Developed a FastAPI-based backend for an LLM-powered RAG application with streaming chat, document upload, role-based access control, and plug-and-play support for multiple LLM models and databases.
- Built a Frappe-based Armory Management & Weapons Tracking System with RFID integration for a state police department, improving asset tracking and operational efficiency.
- Created a Frappe-based Ticketing System for university management, enabling real-time issue tracking and dashboard-based analytics.

Technical Skills

- CI/CD and Automation
- Containerization
- Cloud Based Deployment
- Networking & Load Balancing
- Backup & Recovery Strategies

Languages and Tools

- Python
- Linux
- Shell Scripting
- Git
- GitLab
- Jenkins
- Nginx
- Docker
- MongoDB
- PostgreSQL

Certifications

- [AWS Certified Cloud Practitioner](#)

Personality

- Problem-Solving Mindset
- Collaboration & Communication
- Integrity & Accountability
- Adaptability & Continuous Learning

Educational Background

B. Tech in Civil Engineering

Dr. A. P. J. Abdul Kalam Technical University, U.P
2013 – 2017
